

Regional Impact Report

January, 2018

Now in our fifth year, the Blood Center Foundation of the Inland Northwest celebrates the regional impact we are privileged to make on your behalf of Inland Northwest Blood Center (INBC)/Blood Systems Inc. employees.

We appreciate you taking the time to understand and support what INBC leadership and past Boards of Directors worked diligently to provide. To have a foundation that makes a financial impact on INBC and community-wide education, technology, research and capital investments is a true gift made possible over decades of frugal planning and saving.

The funds we raise and invest are centered on intentional efforts, quality outcomes and positive service. Please review our organizational highlights and let me know your ideas about how we might engage with our region even more deeply in the coming years as we address growing health and wellness needs.

Many thanks,

Loreen McFaul, Executive Director
Blood Center Foundation of the Inland Northwest
